

# Closed Drainage System

Wolfpen Pleasant Hill Road  
Public Involvement Meeting #2

Wednesday, October 1, 2008

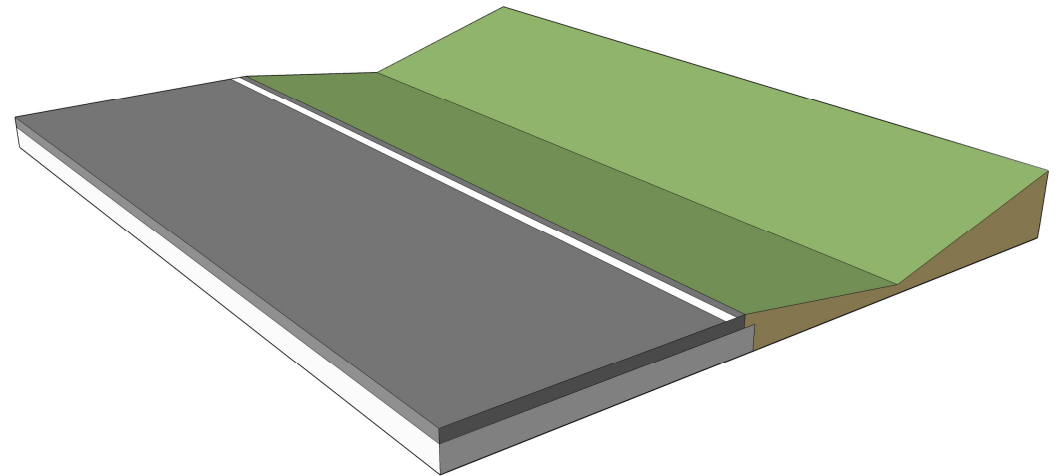

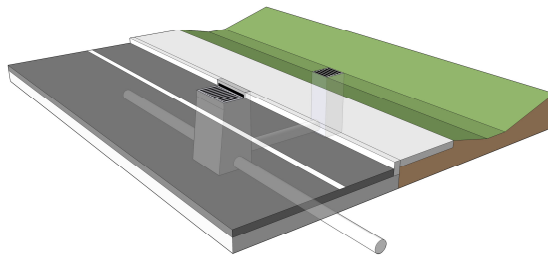

## Proposed Solution

Catch Basins in roadway

Water flows to the road

Water is carried under the pavement

Where ditches are needed, catch basins will catch water  
and carry it to the closed drainage system

## Existing Conditions

All water runs from pavement into ditches

Water stays in ditches

Water stays in your front yard
